

JDCTeK System Optimization™ 2.0 \$225

Through over a decade of custom configuring software and Microsoft Operating Systems to run their best, I have collected all of the performance enhancements and modifications necessary for you to get the most out of your computer system. These modifications will improve stability, security and performance of your PC. You will experience these benefits immediately after completion of the optimization. There are over 500 modifications that are performed on your computer which take between 5-8 hours of labor.

The following are the highlights of this unique service I provide to my customers:

- ⊕ Removal of unused programs, 3rd party programs, unwanted startup programs, unrequired Windows services and trial versions of software that you are not using
- ⊕ Removal of temp files, garbage files, left over fragments in the Windows registry and old Internet cache cluttering your computer system
- ⊕ Registry performance modifications to speed every aspect of your Computer and Internet
- ⊕ File system performance enhancements to speed up startup, shutdown and the launch of any application
- ⊕ Antispyware and Antivirus recommendation and software installation
- ⊕ Installation of common required applications including: Adobe Acrobat, Java, QuickTime, Flash player and Shockwave player
- ⊕ Installation of Windows, Office and Adobe product Service Packs and optional updates

The JDCTeK System Optimization™ 2.0 will result in at least a 100% improvement in performance, and in many cases 200-300%. You invested a lot of money into purchasing a computer, and for a small percentage of the price you paid I can make your computer run better than the manufacturer ever thought possible. Your satisfaction is my goal and is guaranteed 100%.

Who would benefit from this service?

Anyone who wants the following:

- PC to perform much faster than it is currently
- PC configured with heightened security measures
- Common web utilities installed to ensure Internet browsing is not hindered
- All Updates and Patches for Windows, Office and other client applications
- Annoying error messages at startup or shutdown fixed
- Total computer system optimization
