

Virus and Spyware Removal \$145
Add JDCTek System Optimization™ for ~~\$200~~ \$125

This process includes the use of multiple aggressive scanning and removal tools to rid your computer of unwelcome guests. Manual removal of infected files, registry entries and hidden process are also additional steps to complete this process. I will also explain how this virus or spyware was obtained so you can prevent future infections. I will also recommend Antivirus and Antispyware solutions that actually keep you protected compared to what you currently have installed which failed you.

The following are also performed to safeguard your computer from threats:

- ⊕ Removal of temp files, garbage files, left over fragments in the Windows registry and old Internet cache where virus and spyware like to hide
- ⊕ Antispyware and Antivirus recommendation and software upgrade

With current virus and spyware attacking our computers on a more frequent basis the damage they cause is also increasing. Successful removal is not always possible and in about 5% of cases the computer will need to be completely reloaded to its original state. This can be accomplished by using a manufacturer supplied System Recovery disk or using my JDCTek Operating System re-installation service which will transform your PC into a trouble-free, high performing system.

Optional yet highly recommended ESET NOD32 Antivirus with Spyware protection is the only protection JDCTek recommends. If you are currently using one of the Internet Security Suite products and additional Anti-Spyware you are slowing down your system tremendously. ESET uses the least amount of CPU, Memory and has the highest scanning speed of any other product. Updates are automatically downloaded within hours of new Virus and Spyware infections found around the globe. Typically you will receive 3-5 anti-virus updates a day compared to once a day with most products.

Adding the JDCTek System Optimization™ service after Virus Removal will reclaim performance and cleanup years worth of system problems. Please read about it on my services page. Due to the combination of services I am offering a 45% discount.
